

Data Collection and Preprocessing Phase

Date	19 September 2024
Team ID	MCA
Project Title	Strategic Employee Attrition Intelligence Dashboard
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Template

The Data Collection Plan identifies the employee attrition data required to analyze the reasons behind employee turnover. It focuses on collecting and organizing employee information related to compensation, workload, engagement, career progression, and work arrangement to identify factors associated with the 17.9% attrition rate and support data-driven retention decisions.

Data Collection Plan Template

Section	Description
Project Overview	The project aims to analyze employee attrition and identify the key factors associated with the 895 employees who left out of 5,000 employees (17.9%) . The analysis focuses on compensation, workload, engagement, career progression, and work arrangement to support data-driven employee retention decisions.
Data Collection Plan	Employee data will be collected from the provided Employee Attrition Dataset , containing demographic, job, compensation, workload, engagement, career progression, work-life, and work arrangement information along with the employee attrition outcome.

Raw Data Sources Identified	The primary raw data source is the Employee Attrition CSV dataset. It contains 5,000 employee records and 29 attributes, which will be used for data preprocessing, exploratory analysis, and development of the Strategic Employee Attrition Intelligence Dashboard.
