

Project Initialization and Planning Phase

DATE	18 September 2026
Team ID	MCA
Project Name	Strategic Employee Attrition Intelligence Dashboard
Maximum Marks	3 marks

Define Problem Statements (Customer Problem Statement Template):

The company is facing a serious retention issue, with 895 out of 5,000 employees (17.9%) having left the organization. Right now, human resources and leadership do not know exactly why people are quitting or which specific factors—such as low compensation, heavy workloads, poor engagement, lack of career growth, or bad work arrangements—are the main drivers behind this turnover. Without this clear data insight, HR cannot decide where to spend its retention budget or how to design effective solutions to keep staff. To fix this, the project aims to build a Strategic Employee Attrition Intelligence Dashboard that identifies the exact root causes of employee flight, allowing the company to make data-driven decisions to stop turnover and protect its workforce.

Example:

Problem Statement (PS)	I am (Customer)	I’m trying to	But	Because	Which makes me feel
PS-1	An HR Director at an organization with high turnover	prioritize our retention budget and design targeted interventions to keep staff	we do not understand why 895 out of 5,000 employees (17.9%) have left	we lack the clear data insight to know which factors (like compensation, workload, or engagement) strongly predict attrition	frustrated and uncertain about where to spend resources effectively.

PS-2	A People Analytics Manager	build a Strategic Employee Attrition Intelligence Dashboard	it is difficult to isolate the primary operational drivers of turnover	the data is likely scattered across separate systems (payroll, exit surveys, performance reviews)	overwhelmed by the challenge of turning raw data into actionable workforce intelligence.
