

Dashboard Design

Date	24 September 2024
Team ID	MCA
Project Name	Strategic Employee Attrition Intelligence Dashboard
Maximum Marks	5 Marks

Creating an effective Employee Attrition Dashboard involves presenting employee and workforce information in a clear, relevant, and easy-to-understand format. The dashboard is designed in Power BI to help users analyze employee attrition, identify workforce patterns, and understand important factors related to employee turnover. It uses KPI cards, charts, filters, and interactive visuals to present key employee metrics and support data-driven decision-making.

Activity 1: Interactive and visually appealing dashboards

Creating an interactive and visually appealing employee attrition dashboard involves using appropriate visual elements, clear layouts, and interactive features to make workforce insights easy to explore. The dashboard provides an interactive view of employee attrition based on department, job role, and work mode, along with key indicators such as total employees, employees who left, attrition rate, average years at company, average monthly income, and AI adoption rate.

1. Clear and Intuitive Layout

The dashboard organizes important employee attrition metrics at the top and detailed visualizations below them, making the information easy to understand.

2. Use of Appropriate Visualizations

Different Power BI visualizations are used to represent employee attrition information, including KPI cards, bar charts, and interactive charts.

3. Colour and Theming

A consistent purple-themed dashboard design is used to provide a professional and visually consistent appearance.

4. Interactive Filters and Slicers

The dashboard contains slicers for:

- **Work Mode**
- **Department**
- **Job Role**

These filters allow users to analyze employee attrition for specific categories.

5. Drill-Down and Detailed Analysis

The dashboard provides department- and job-role-level information so that users can examine attrition patterns at different organizational levels.

6. Responsive Design

The dashboard arranges KPI cards and visualizations in a structured layout so that important information can be viewed together.

7. Custom Visuals and Icons

KPI cards and graphical elements are used to highlight important workforce metrics.

8. Infographics

The dashboard combines numerical indicators and charts to communicate employee attrition insights in an easy-to-understand format.

Here are potential outcomes from the dashboard image provided:

Major Outcomes

- Total Employees:** The dashboard contains data for **5,000 employees**, providing an overall view of the organization's workforce.
- Employee Attrition:** **895 employees have left the organization**, while the dashboard indicates an overall attrition rate of approximately **18%**.
- Average Years at Company:** Employees have an average tenure of approximately **6.72 years**, providing an overview of workforce experience and retention.

4. Department-Level Attrition:

The dashboard shows differences in attrition rates across departments. **Customer Support has the highest displayed attrition rate at 24%**, followed by Sales at 20% and Marketing at 19%.

5. Job Role Attrition:

Attrition varies across job roles, with **Support Team Lead showing the highest displayed attrition rate at 26%**, followed by Support Specialist at 25%.

6. Workforce and Income Information:

The dashboard reports an **average monthly income of approximately 7K**, providing an additional workforce compensation indicator.

7. AI Adoption:

The dashboard displays an **AI Adoption Rate of 0.6**, while the AI-tool-usage visual compares employees based on whether AI tools are used in their work.

8. Interactive Analysis:

Users can select **Work Mode, Department, and Job Role** using the dashboard slicers to examine how employee attrition patterns change across different workforce categories.
